In the academic year of 2017/2018 the study of internal medicine shall be conducted in the following manner:

The prerequisite for participating in a pre-state examination block of internal medicine is passing all examinations of years 3, 4 and 5. This will be inspected at the Study Department before any enrolment into the module.

In order to be accepted, knowledge of propaedeutics and examined subjects of previous years are a prerequisite. A big emphasis will be put on practical knowledge. In the practical part, practice in hospitals outside Prague is preferred.

**1. TUITION TIMETABLE:**

Tuition takes 12 weeks with the following timetable: first two weeks of mandatory seminars on internal medicine, then one week of occupational medicine, eight weeks of practice, one week for preparation for examinations, and the last week is reserved for internal medicine state examinations.

**2. OBLIGATORY SEMINARS:**

The obligatory seminars will always take place in the first two weeks through the internal medicine block according to the schedule so as to cover basic issues of internal medicine. The seminars will take place from 8.30 a.m. to 3.45 p.m. During the introductory seminar (Monday 8:30, classroom in pavilion S1, ground floor) students will receive all information and documents including a schedule of seminars, a logbook (syllabus of skills which a student should acquire during the internship). Confirmation about participation in individual forms of tuition will be recorded into the mentioned documents and signed by the teacher. Students may request special seminars from either the head of the department prof. Anděl or Head of 6th year classes as. Hoffmanová.

**3. PRACTICE BEFORE STATE EXAMINATION:**

The training preceding the state examination will take place in the University Hospital of Královské Vinohrady or in contractual hospitals (Ostrów nad Odrą, Kadaň, Ústí nad Labem, Teplice, Chomutov, Most, Liberec, Mladá Boleslav, Mělník, Kolín, Brandýs nad Labem, Nymburk, Časlav, Tábor) or in other hospitals in the Czech Republic and European countries. As part of this practice, students will work under supervision at a ward as junior doctors, i.e. full 8.5 hours per day. They will attend morning reporting, large ward rounds, X-ray rounds or other seminars. Under supervision they will conduct a ward round at an assigned room, and will actively report on patients during rounds. All student entries in medical documentation must be legibly signed and must be always verified by the treating or supervising doctor. Students do not prescribe even a therapy or a more complex examination. They, however, participate in diagnostic and therapeutic reports and autopsies.

**4. CREDIT:**

A credit is to be granted prior to the oral part of internal medicine of the SRE by the Head of Department and shall be entered into the faculty register (SIS). In order to be granted the credit, the student must bring a confirmed report on lessons taken. (i.e. logbook and statement of participation of seminars.) The credit shall be granted on the condition that the student has at least 80% attendance and 100% confirmation of skills and training at a hospital. Illness is excused within 1 week by the head of class, a longer absence by the department head.

**5. ADVANCED STATE EXAMINATION – INTERNAL MEDICINE:**

The prerequisite for participating in a pre-state examination block of internal medicine is passing all examinations of years 3, 4 and 5. This will be inspected at the Study Department before any enrolment into the module.

In order to be accepted, knowledge of propaedeutics and examined subjects of previous years are a prerequisite. A big emphasis will be put on practical knowledge. In the practical part, practice in hospitals outside Prague is preferred.
